

The California Elections and Policy Polls (CEPP) of California's Competitive U.S. House Districts, eight polls conducted September 14-21, 2024

The California Elections and Policy Polls (CEPP) are representative surveys of California likely voters within individual U.S. House districts. In total, we conducted 8 separate polls in 8 House elections. Two of the polls were conducted in Democrat-versus-Democrat general elections (CA-12 in the East Bay, an open seat due to Rep. Barbara Lee's retirement; and CA-16 in the San Jose/South Bay area, an open seat due to Rep. Anna Eshoo's retirement). Six of the polls were conducted in Democrat-versus-Republican general elections in the most purple districts in the state (CA-13 in the San Joaquin Valley; CA-22 in the Central Valley/Bakersfield; CA-27 in L.A. County; CA-41 in Riverside County; CA-45 in Orange County; and CA-47 in Orange County). Each survey was fielded September 14 to 21, 2024. These survey results are a snapshot of the electorate's attitudes within each congressional district on the days in which the polls were fielded and may not reflect changes to voter attitudes that occur between now and Election Day.

Each poll asked about vote choices in the U.S. House general election in each district. Each poll also measured vote choices for the U.S. Senate general election, the U.S. presidential general election, voter excitement for the upcoming election, and feelings about the economy. Each poll of the congressional districts also asked respondents to briefly describe in open-ended responses the word or words that come to mind when thinking about each U.S. House candidate. While we present results for all congressional districts below in one document, it is important to note that each poll was conducted separately within each congressional district; and sampling and weighting were done within each district to ensure the electorate was representative of each district. Results presented are for likely voters. Each congressional district poll has its own sample size and margin of error (reported as N and MoE in the polling results below). For additional methodological details, see the statement of methodology below. Toplines and crosstabs may not sum to 100% due to rounding.

The polls are conducted by a team including Dr. Christian Grose (University of Southern California); Dr. Matthew Mendez Garcia (CSU, Long Beach); Raquel Centeno (University of Southern California); Dr. Jarred Cuellar (Cal Poly Pomona); Dr. Matt Lesenyie (CSU, Long Beach); and Jose Alcocer (University of Southern California).

Summary of topline findings from the California Elections and Policy Polls of competitive U.S. House districts:

1. We polled six of the most competitive congressional districts between Democrats and Republicans in California. Democratic U.S. House candidates lead in 4 of 6 of these congressional districts, are tied in a fifth, and a Republican House candidate is winning in 1 of 6 of these districts. Please note the margins of error in each of these polls suggest all six of these races are statistical dead heats. The topline number in the six competitive districts with a Democrat and Republican on the ballot show Democratic House candidates ahead in CA-13, CA-22, CA-27, CA-45; the Republican House candidate leading in CA-47; and an exact tie in the polling estimates in CA-41. The Republican party currently controls the U.S. House by a slim margin of about 4 seats, so which party wins these California districts could easily affect party control of the House after the 2024 elections. These polling results are displayed in the table below in order from Democratic to Republican strength in the topline numbers.

| U.S. House District | Vote for Dem. House candidate | Vote for GOP House candidate | Polling Lead* |
|--------------------------------------|-------------------------------|------------------------------|---------------|
| CA-22: Valadao/R-inc. v. Salas/D | 42.7% | 38.5% | +4.2 D |
| CA-13: Duarte/R-inc. v. Gray/D | 44.4% | 42.4% | +2.0 D |
| CA-45: Steel/R-inc. v. Tran/D | 44.8% | 43.3% | +1.5 D |
| CA-27: Garcia/R-inc. v. Whitesides/D | 44.4% | 43.1% | +1.4 D |
| CA-41: Calvert/R-inc. v. Rollins/D | 46.1% | 46.1% | +0 D / R |
| CA-47: Baugh/R v. Min/D [open seat] | 42.5% | 46.2% | +3.7 R |

*All of these polling leads are within the margin of error for each poll.

2. Democrats still maintain leads in these same 4 districts when undecided voters are pushed to choose a candidate in a follow-up question, though the lead gets smaller in three of the six districts as undecided voters in those districts lean toward the Republican candidates. Including those who said they plan to vote for one of the candidates in the initial vote choice question along with undecided voters who were pushed to choose a candidate, the polling outcomes in the above table do not change much. Democrats still lead in these same four districts of CA-13, CA-22, CA-27, and CA-45 (still within the margin of error); Republicans still lead in CA-47 (within the margin of error); and the Republican candidate goes ahead by 0.4 points in CA-41 when undecided leaners are forced to choose (still within the margin of error).

3. Yet undecided voters – if they break toward one candidate or party in each district – will likely determine the outcome in these six “purple” districts. When asked “Even though you said you didn't know who you plan to vote for in the US House election, if you were forced to choose, who would you vote for?” undecided voters in three districts (CA-13, CA-22, and CA-41) narrowly favored the Republican candidate. Undecided voters in three other districts (CA-27, CA-45, and CA-47) narrowly favored the Democratic candidate. The table below shows this breakdown by district, listed in order by the highest percentages of undecided voters.

| U.S. House District | % Undecided likely voters in district | Undecideds in district break toward which party when forced?* |
|--------------------------------------|---------------------------------------|---|
| CA-22: Valadao/R-inc. v. Salas/D | 16.3% | R |
| CA-45: Steel/R-inc. v. Tran/D | 11.3% | D |
| CA-13: Duarte/R-inc. v. Gray/D | 10.6% | R |
| CA-27: Garcia/R-inc. v. Whitesides/D | 10.4% | D |
| CA-47: Baugh/R v. Min/D [open seat] | 10.1% | D |
| CA-41: Calvert/R-inc. v. Rollins/D | 7.1% | R |

*Undecided voters were also given an option to say “I really don’t know” when forced to choose, and many chose this third option.

4. Lateefah Simon and Sam Liccardo lead in potentially competitive Democrat-versus-Democrat open seat House elections in the Bay Area. We polled two open seats where a Democrat faces off against another Democrat. In CA-12 in the East Bay, Lateefah Simon is ahead of Jennifer Tran 27.9% to 14.8% in the election to replace retiring Rep. Barbara Lee. However, more than half of CA-12 voters are undecided in this U.S. House race. In CA-16, in the south Bay, Democrat and former San Jose mayor Sam Liccardo has a lead of 30.9% to 20.1% over Democrat and Assembly member Evan Low. Over 40% of voters in CA-16 say they are undecided. Both Simon and Liccardo’s leads are outside of the margin of error.

| | Dem. Candidate | Dem. Candidate | Polling Lead* |
|-------|--------------------|----------------|----------------|
| CA-12 | L. Simon, 27.9% | J. Tran, 14.8% | +13.1 Simon |
| CA-16 | S. Liccardo, 30.9% | E. Low, 20.1% | +10.8 Liccardo |

*These are both outside the margin of error for each poll.

5. When undecided voters are pushed to choose in Democrat-versus-Democrat CA-12 and CA-16, Simon and Liccardo open up bigger leads against their same-party opponents. In CA-12, when undecideds are forced to choose, Simon opens up a 14 %-point lead instead of a 13.1 %-point lead. In CA-16, when undecideds are forced to choose, Liccardo opens up a 16.5 %-point lead instead of a 10.8 %-point lead.

6. California Democratic House candidates have the wind at their back, yet Republican candidates show resilience in these polls relative to the top of the ticket. House Republican candidates in most of the purple districts are outperforming GOP Senate candidate Steve Garvey and GOP presidential nominee Donald Trump even while locked in tight House races. Even though Democratic House candidates have margin-of-error leads in the majority of purple House districts surveyed, in five of these six purple districts [CA-13, CA-22, CA-27, CA-45, CA-47], the Republican House candidate is polling better than the GOP Senate candidate (Steve Garvey) is polling within these districts. Most of these House Republican candidates are also polling better than GOP presidential candidate Donald Trump within their districts. This suggests strength from presidential nominee Kamala Harris and Senate candidate Adam Schiff at the top of the Democratic ticket could be offset by strong showings from House Republican candidates, or that a strong turnout for Democrats at the top of the ticket could knock out several of the Republican incumbents despite their ticket-splitting resilience.

7. In CA-41, Republican Ken Calvert is the only incumbent underperforming the GOP candidates at the top of the ticket. Will Rollins is tied 46.1%-46.1% with Calvert because Rollins has consolidated Democratic voters in CA-41 and is peeling off a small but significant number of Rollins-Garvey voters. Unlike his GOP colleagues, Calvert is doing about 4 points worse than Steve Garvey in the district. Garvey leads Schiff in CA-41 in the U.S. Senate race. Yet, among voters who voted in 2022, Calvert is winning narrowly. Undecided voters in the 2024 election are breaking toward Calvert 24.5% to 18.4%. This lean-GOP district appears to be competitive heading into November.

8. CA-41 is shaping up as a race of extremity and personal characteristics. When asked to provide a word or words about each candidate, the most common word describing Calvert was “corrupt” (26.1% of likely voters) and the most common words describing Rollins were “liberal/too liberal” (12.6% of likely voters) followed by “young” and “fresh” (11.2%).

9. Democratic leads in most of these D-versus-R districts are due to voters who say they are likely to vote in 2024 but who said they did not vote in 2022.

If Democratic candidates win in these competitive House districts, they will have won due to the presence of presidential-year voters who do not always participate in midterms as these district polls show that those who did not vote in 2022 are favoring Democratic House candidates.

For example, in CA-27, Democrat George Whitesides has support from 34.6% of those who did not vote in 2022 but plan to vote in 2024; and Republican Mike Garcia has support from 17.9% of those who did not vote in 2022 but plan to vote in 2024 (the remainder of 2022 non-voters are undecided). Another example is CA-45, where 38.7% of 2022 non-voters who plan to vote in 2024 support Democrat Derek Tran while 23.9% of these 2022 non-voters likely to vote in 2024 are for Republican Michelle Steel. In CA-22, 2022 non-voters likely to vote in 2024 are more evenly split with 27.9% for Democrat Rudy Salas, 24.4% for Republican David Valadao, and the rest of 2022 non-voters undecided between Valadao and Salas. If Republicans win in these competitive House districts, these polls suggest they will do so because the districts' electorates were similar enough to the 2022 general electorates; or because the Republican candidates are able to convince just enough new voters to cast ballots for GOP House candidates down ticket even as more voters head to the polls in a presidential election year. The polling data show advantages for Democrats due to higher participation in 2024 from those who did not vote in 2022.

10. Michelle Steel and Derek Tran are in a neck-and-neck race. Perhaps more than any other district polled, the underlying partisanship favors Democrats. In CA-45, Democrat Adam Schiff leads Republican Steve Garvey by 6.8 percentage points and Kamala Harris leads Donald Trump in CA-45 by 8.3 percentage points. House Republican Michelle Steel trails Democrat Derek Tran by only 1.5 percentage points, demonstrating Republican endurance in a Democratic-leaning district. Yet Tran's lead within the margin of error suggests a Democratic wave could push out Steel despite her stronger performance than Republicans at the top of the ticket in U.S. House district 45.

11. A potential bright spot for Republicans is CA-47 (an open seat where Rep. Katie Porter is stepping down). While within the margin of error, meaning either candidate could win, Republican Scott Baugh leads Democrat Dave Min. The poll of CA-47 shows attacks against Min's DUI arrest have worked. In the poll, we asked likely voters in CA-47 to list a word or words to describe each candidate.

Min's most frequent open-ended mention by voters in response to this question was "DUI" or "Drunk" or "Drunk driving" or "Drunk driver" (14.9%). Baugh's most frequent mention was "Conservative" (15.2% of voters offered this word for Baugh).

12. In CA-27 in northern Los Angeles County, Democrat George Whitesides is ahead of Republican incumbent Mike Garcia, though the margin of error suggests the race is statistically tied. Unlike some other districts polled, undecided voters in CA-27 are breaking toward the Democratic challenger instead of toward the Republican incumbent. Whitesides leads Garcia 44.4% to 43.1% with 10.4% saying they don't know who they will vote for (and 2.1% plan to not cast a ballot in this election). When pushed, the 10.4% of undecideds break 36.7% to 29.2% to Whitesides with the remaining 24.0% still undecided. Including both supporters and undecided leaners, Whitesides is ahead 48.2% to Garcia's 46.1%.

13. Republican incumbent David Valadao is locked in a tight race with Democrat Rudy Salas. Salas leads by 4.2 % points, though this is within the margin of error of +/-6.1 given this district had the smallest sample size of all eight House district polls. Turnout will determine who wins CA-22, and the presidential election year may make the difference. One-quarter of likely voters did not vote in the 2022 election, and these new voters slightly favor Salas. Harris leads Trump in the presidential race by a wide 7.3 percentage points in the district, and Schiff leads Garvey by more than 8 points, providing a potential top-of-the ticket boost for Democrat Salas. On the other hand, Valadao has advantages as well. Voters' comments about Valadao are generally positive, noting he is a "Farmer" and that he "Cares about people in the Valley" when respondents were asked to describe him. Also favoring Valadao: A majority of voters who voted in the 2022 election who also plan to vote in 2024 support Valadao, as do undecided voters in CA-22 when they are pushed to choose a candidate (31.6% of undecided voters favor Valadao when pushed and 26.5% of undecided voters favor Salas; the rest were still undecided even when forced to choose).

14. CA-13 voted overwhelmingly for Biden in 2020 by almost 11 percentage points, but Harris leads by only 3.3 percentage points in the poll so there may be a shift in CA-13 toward the Republicans at the top of the ticket in this district. However, in the CA-13 poll, incumbent Republican John Duarte trails Adam Gray by 2 percentage points (within the margin of error). Duarte won the district by only about 500 votes over Gray in 2022 and turnout in 2024 will determine who wins. According to the poll, those who voted in 2022 who plan to vote in 2024

narrowly favor Republican Duarte, but new voters narrowly favor Democrat Gray. Further, voters who are very excited about the 2024 election heavily favor Gray over Duarte.

15. Voters excited to take part in the 2024 election favor House Democratic candidates by large margins in the six purple districts polled. The cross-tabs show that the enthusiasm gap favors Democratic House candidates, and this enthusiasm gap is particularly pronounced in five of the six competitive districts featuring a Democratic candidate and a Republican candidate. The table below shows that voters who are very excited to vote in 2024 favor the Democratic House candidate by double digits in CA-13 (+14.9 Democrat Adam Gray); in CA-27 (+11.7 Democrat George Whitesides); in CA-41 (+12.6 Democrat Will Rollins) in CA-45 (+13.2 Democrat Derek Tran); and in CA-47 (+13.1 Democrat David Min). The only districts where enthusiasm is relatively similar is CA-22, where voters who are very excited to vote in 2024 favor Democrat Rudy Salas over Republican David Valadao by only 1.6 percentage points.

| U.S. House District | Very excited to vote, Vote for Dem. House candidate* | Very excited to vote, Vote for GOP House candidate* | Polling lead, only among very excited voters* |
|--------------------------------------|--|---|---|
| CA-13: Duarte/R-inc. v. Gray/D | 52.1% | 37.2% | +14.9 D |
| CA-45: Steel/R-inc. v. Tran/D | 52.7% | 39.5% | +13.2 D |
| CA-47: Baugh/R v. Min/D [open seat] | 54.1% | 41.0% | +13.1 D |
| CA-41: Calvert/R-inc. v. Rollins/D | 54.5% | 41.9% | +12.6 D |
| CA-27: Garcia/R-inc. v. Whitesides/D | 52.1% | 40.4% | +11.7 D |
| CA-22: Valadao/R-inc. v. Salas/D | 46.5% | 44.9% | +1.6 D |

*Voters were asked if they are very excited, somewhat excited, somewhat not excited, or very not excited to vote in the 2024 election. The table reports vote support for those saying they are very excited.

16. Voters in the East Bay are proud that Kamala Harris could become president of the United States. When reminded that Harris spent much of her early life in the East Bay area of California, 34.6% of CA-12 [based in Oakland and Berkeley] voters are very proud and 27.3% are somewhat proud that Harris has roots in the East Bay and could be elected the next president of the United States.

Polling methodology for each U.S. House district survey: Each congressional district had its own survey conducted. The sample size and margin of error for each individual congressional district survey is as follows:¹

CA12/East Bay (Lateefah Simon, D vs. Jennifer Tran, D), open seat, N=510 LVs, MoE +/-4.3%²
CA13/San Joaquin Valley (John Duarte, R-inc. vs. Adam Gray, D), N=311 LVs, MoE +/-5.6%
CA16/San Jose (Sam Liccardo, D vs. Evan Low, D), open seat, N=544 LVs, MoE +/-4.2%
CA22/Central Valley (David Valadao, R-inc. vs. Rudy Salas, D), N=263 LVs, MoE +/-6.1%
CA27/LA County (Mike Garcia, R-inc. vs. George Whitesides, D), N=522 LVs, MoE +/-4.3%
CA41/Riverside County (Ken Calvert, R-inc. vs. Will Rollins, D), N=539 LVs, MoE +/-4.2%
CA45/Orange County (Michelle Steel, R-inc. vs. Derek Tran, D), N=498 LVs, MoE +/-4.4%
CA47/Orange County (Scott Baugh, R vs. Dave Min, D), open seat, N=525 LVs, MoE +/-4.3%

Within each separate poll, voters were randomly sampled from the list of voters in each congressional district (relying upon the California voter file), ensuring equal probability of participation for all voters in the district; and to provide representativeness of the district's voters. Then, voters were screened for those who said they were "very likely" or "somewhat likely" to vote. Each survey was fielded by email to all sampled voters using an online survey platform. For each individual poll, once all survey data were collected, for greater statistical precision and accuracy, we calculated and used survey weights that are standard in the field to adjust for observable non-response. These weights were calculated for each individual respondent based on representative data on voters within each congressional district. These survey weights were calculated separately for each congressional district poll and were used in calculating the topline and crosstab results for each poll in each district. This method makes each congressional district poll's results representative of the 2024 likely voter electorate in each district. Survey weighting included party registration, past voting behavior, and demographic variables (gender, race/ethnicity, age, party ID) within each district. A raking procedure using the anesrake method in the statistical program R was conducted to compute the weights. The polling was conducted by Data Viewpoint for the CSU-Long Beach Urban Politics and Policy Center in partnership with USC and Cal Poly Pomona. The surveys were fielded in English, Spanish, Korean, Mandarin/Chinese, and Vietnamese.

¹ There are larger margins of error for subsamples and crosstabs – these are the topline sample sizes and margins of error.

² LVs=Likely voters; N=sample size; MoE=Margin of error in each district poll.

TOPLINE RESULTS

LIKELY VOTERS, CA-12 (Lateefah Simon/D v. Jennifer Tran/D)

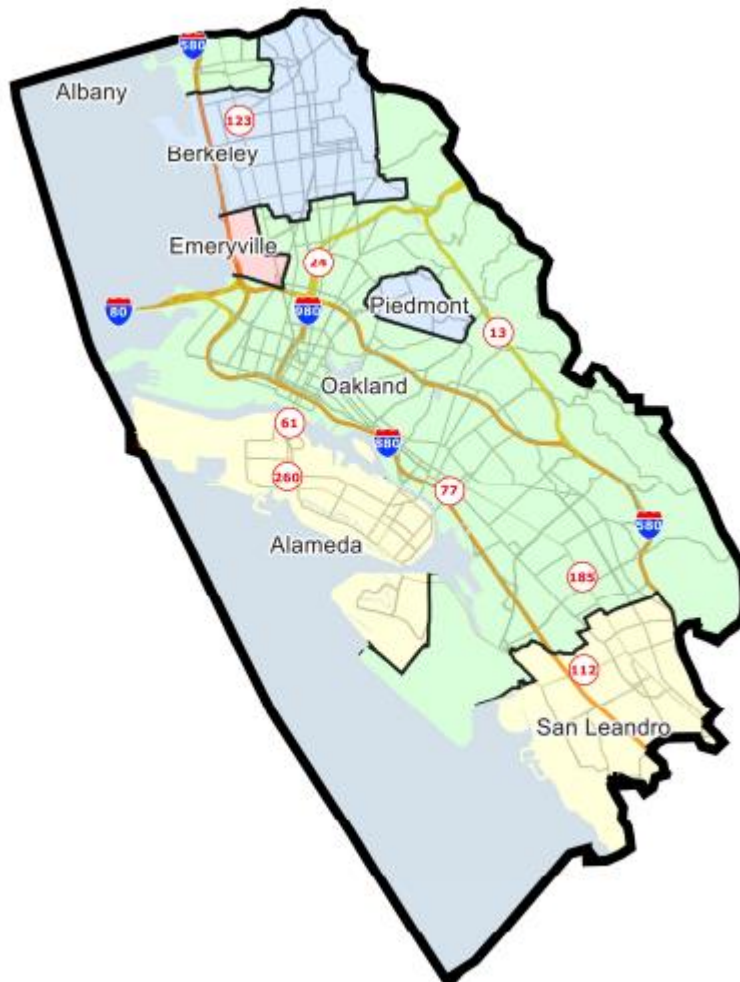

Poll conducted,
September 14-21, 2024

presented at the end of this document after all the
congressional district topline results

CA-12 (East Bay)

Lateefah Simon/D v. Jennifer Tran/D (open seat)

Source for district map: [California Citizens Redistricting Commission](https://www.redistricting.ca.gov/).

CA-12. Lateefah Simon [D] versus Jennifer Tran [D]
N=510 likely voters. MofE +/-4.3%

All questions listed candidate choices in randomized order; and listed candidate political party and occupation as will be displayed on actual ballot.

US House election, likely voters in U.S. House district 12

US House: All likely voters: Thinking ahead to the 2024 November general election, who do you plan to vote for to be US House Representative?

27.9% Lateefah Simon (Democrat)
14.8% Jennifer Tran (Democrat)
54.4% Don't know
2.9% I will skip this election

US House: Undecided US House likely voters only: Even though you said you didn't know who you plan to vote for in the US House election, if you were forced to choose, who would you vote for? [asked only to those answering 'Don't know' to above vote choice question to measure undecided leaners]

24.3% Lateefah Simon (Democrat)
22.6% Jennifer Tran (Democrat)
53.2% I really don't know

US House: All likely voters with undecided leaners: Combining responses to "Thinking ahead to the 2024 November general election, who do you plan to vote for to be US House Representative?" and "don't know" responses to branch question "Even though you said you didn't know who you plan to vote for in the US House election, if you were forced to choose, who would you vote for?"

41.1% Lateefah Simon (Democrat)
27.1% Jennifer Tran (Democrat)
28.9% Don't know, then answered 'I really don't know' to leaner branch question
2.9% I will skip this election

US Senate election, likely voters in U.S. House district 12
N=510 likely voters. MofE +/-4.3%

US Senate: All CA-12 likely voters: Thinking ahead to the 2024 November general election, who do you plan to vote for to be US Senator?

80.7% Adam Schiff (Democrat)
8.4% Steve Garvey (Republican)
7.4% Don't know
3.5% I will skip this election

US Senate: CA-12 likely voters, only those undecided on US Senate: Even though you said you didn't know who you plan to vote for in the US Senate election, if you were forced to choose, who would you vote for? [asked only to those answering 'Don't know' to above vote choice question to measure undecided leaners]

31.9% Adam Schiff (Democrat)
43.5% Steve Garvey (Republican)
24.6% I really don't know

US Senate: All CA-12 likely voters with undecided Senate leaners: Combining responses to "Thinking ahead to the 2024 November general election, who do you plan to vote for to be US Senator?" and "don't know" leaners' responses to branch question "Even though you said you didn't know who you plan to vote for in the US Senate election, if you were forced to choose, who would you vote for?"

83.0% Adam Schiff (Democrat)
11.6% Steve Garvey (Republican)
1.8% I really don't know
3.5% I will skip this election

US presidential election, likely voters in U.S. House district 12
N=510 likely voters. MofE +/-4.3%

President/VP: All CA-12 likely voters: Thinking ahead to the 2024 November general election, who do you plan to vote for president and vice president?

79.4% Kamala Harris and Tim Walz (Democrat)
6.1% Donald Trump and J.D. Vance (Republican)
2.1% Robert Kennedy Jr. and Nicole Shanahan (American Independent)
2.0% Chase Oliver and Mike ter Maat (Libertarian)
4.2% Jill Stein and Rudolph Ware (Green)
1.7% Claudia de la Cruz and Karina Garcia (Peace and Freedom)
3.7% Don't know
<1% I will skip this election

President/VP: CA-12 likely voters, only those undecided on US president: Even though you said you didn't know who you plan to vote for in the US presidential election, if you were forced to choose, who would you vote for? [asked only to those answering 'Don't know' to above vote choice question to measure undecided leaners]

59.2% Kamala Harris and Tim Walz (Democrat)
<1% Donald Trump and J.D. Vance (Republican)
4.4% Chase Oliver and Mike ter Maat (Libertarian)
<1% Robert Kennedy Jr. and Nicole Shanahan (American Independent)
14.5% Jill Stein and Rudolph Ware (Green)
<1% Claudia de la Cruz and Karina Garcia (Peace and Freedom)
22.0% I really don't know

President/VP: All CA-12 likely voters with undecided presidential leaners: Combining responses to "Thinking ahead to the 2024 November general election, who do you plan to vote for president and vice president?" and "don't know" leaners' responses to branch question "Even though you said you didn't know who you plan to vote for in the US presidential election, if you were forced to choose, who would you vote for?"

81.6% Kamala Harris and Tim Walz (Democrat)
6.1% Donald Trump and J.D. Vance (Republican)
2.1% Robert Kennedy Jr. and Nicole Shanahan (American Independent)
2.2% Chase Oliver and Mike ter Maat (Libertarian)
4.8% Jill Stein and Rudolph Ware (Green)
1.7% Claudia de la Cruz and Karina Garcia (Peace and Freedom)
<1% I really don't know
<1% I will skip this election

CA-12 likely voters: Kamala Harris spent much of her early life in the East Bay Area of California and could become the next president of the United States. Does this make you proud to be a resident of the East Bay or of California?

34.6% Very proud
27.3% Somewhat proud
2.1% Somewhat not proud
4.1% Very not proud
31.9% This doesn't matter to me
<1% Don't know

CA-12 likely voters: What word or words come to mind when you think of Lateefah Simon? Please write the word or words below. If you are not sure, you can just write "Don't know" or skip this question.

14.4% BART/Transit policy
10.1% Barbara Lee/Barbara Lee endorsed
9.4% Progressive
6.4% Black
5.8% Strong
5.0% Liberal
5.0% Committed
4.3% Women/women's rights
4.3% Democrat
3.6% Civil rights
3.6% Experience/Experienced
3.6% Leader
3.6% Social justice
<3% All other open-ended comments

[these percentages excluded those who said don't know or did not answer; or open-ended responses that were stated by less than 1% of respondents]

CA-12 likely voters: What word or words come to mind when you think of Jennifer Tran? Please write the word or words below. If you are not sure, you can just write "Don't know" or skip this question.

9.3% new/an unknown

9.0% Asian / Asian American

5.6% Vietnamese

6.7% Who?

6.3% Professor

6.0% Liberal

5.4% Qualified

4.0% Capable

4.2% Conservative

4.2% Corrupt

4.2% Educated

<3% All other open-ended comments

[these percentages excluded those who said don't know or did not answer; or open-ended responses that were stated by less than 1% of respondents]

CA-12 likely voters: How excited are you about the upcoming November election?

39.2% Very excited

28.1% Somewhat excited

10.0% Somewhat not excited

21.0% Very not excited

1.8% Don't know

CA-12 likely voters: Over the last year, would you say local economic conditions in your area are getting better or worse?

23.0% Better

34.1% Worse

38.6% About the same

4.3% I'm not sure / don't know

CA-12 likely voters: Over the last year, would you say California's economic conditions are getting better or worse?

23.3% Better
38.8% Worse
31.3% About the same
6.7% I'm not sure / don't know

CA-12 likely voters: Over the last year, would you say national economic conditions are getting better or worse?

45.3% Better
32.2% Worse

| Katie Porter (D), 2022 vote | 4.6% | 85.4% | 9.4% |
| Scott Baugh (R), 2022 vote | 93.9% | 1.7% | 4.5% |
| Did not vote in 2022/don't remember vote | 31.7% | 20.6% | 38.7% |

Acknowledgments

We would like to thank the Center for Urban Politics and Policy at California State University, Long Beach; the University of Southern California Dornsife School of Letters, Arts, and Sciences; the USC Price School of Public Policy; and California Polytechnic University, Pomona. We would like to thank Dean Deborah Thien of CSU Long Beach and Ty Kim of CSU Long Beach for support for the poll. We also would like to thank Paul McQuiston, Nina Raffio, Ileana Wachtel, Lance Ignon, and Christian Hetrick (all of USC) for support for the poll and especially community engagement around the poll. Finally, we thank Professor Matt Lesenyie of CSU Long Beach for writing and contributing questions to the survey. The polling and political data firm Data Viewpoint conducted the survey and provided voter file data.

The California Elections and Policy Congressional Polls (CEPP) Research Team:

Raquel Centeno is a Ph.D. candidate in the Political Science and International Relations department at the University of Southern California studying American politics. Raquel specializes in the areas of public opinion, political psychology, Latino politics, and political behavior. Her dissertation focuses on how partisan and racial group identities jointly influence partisan polarization. Her other research is motivated by questions of how voters' group identities impact their political perceptions and behavior, such as how different primary systems influence political behavior across racial and ethnic subgroups of voters. She has conducted multiple, original surveys as part of her research. For more information on Raquel, please visit <https://racenteno.github.io/>

Dr. Jarred Cuellar is an assistant professor of political science at the California State Polytechnic University, Pomona. Dr. Cuellar's research focuses on American politics, specifically Latino political behavior within the United States. He is a native of Los Angeles County and was raised in Bellflower. His degrees include a BA from UC Irvine, a MA from the University of Arkansas, and a PhD from USC. He has worked on multiple polls and surveys; and earlier this year took his students on an experiential learning visit to the 2024 Iowa caucus.

Dr. Christian R. Grose is Professor of Political Science and International Relations in USC Dornsife College of Letters, Arts, and Sciences and Professor of Public Policy at the University of Southern California in the USC Price School of Public Policy. He is the author of *Congress in Black and White: Race and Representation in Washington and at Home* and over 60 articles and reports, including in the *American Political Science Review*, the *American Journal of Political Science*, the *Journal of Politics*; and *Legislative Studies Quarterly*. He has conducted numerous surveys of the California electorate, surveys of other states, and cities within California. His polls have accurately predicted winners in state, local, and district elections and Dr. Grose's polling is known for its quality and accuracy, including his 2022 poll that correctly predicted the outcome of the Long Beach mayoral election. He is originally from North Carolina, but has lived in California for more than a decade. He can be reached at drchristiangrose@gmail.com or cgrose@usc.edu.

Dr. Matthew Mendez Garcia is Executive Director of the Center for Urban Politics and Policy at CSU Long Beach, where he is also Associate Professor. The Center's polling in collaboration with USC has been remarkably accurate in previous elections. He is a native Californian who holds a Ph.D. in political science from the University of Southern California. Professor Mendez studies American politics, with a focus on representation, legislative behavior, race and ethnicity, political behavior, intersectionality, and immigration. In 2016, he received the award for Best Dissertation from the American Political Science Association's Organized Section on Race, Ethnicity, and Politics. His research has been published in journals such as *Legislative Studies Quarterly*, *Political Research Quarterly*, and *California Journal of Politics and Policy*.
